Industrial Wide-Temp. Storage Solutions

Deliver high reliability in extreme environments

Custom-made for tough embedded uses, Transcend's industrial wide-temp storage solutions, e.g. SSDs, memory cards, USB flash drives…etc., allow devices to operate stably between -40°C~85°C and reach a balance between performance and cost for enterprises.

High tolerance
Valued-added technologies (Conformal Coating, Anti-sulfur, SLC Mode) to enhance endurance.

Reliable data transfer
Built-in ECC mechanism to decrease the risk of single-bit error problems.

Multiple form factors
Various form factors fit into a wide range of devices and platforms.
