

Telecommunications Network

Connect beyond boundaries

High-performance, stable embedded storage solutions offer rapid data processing, ensuring efficient real-time data transfer and access in telecommunications networks. Transcend offers a comprehensive SSD product line for critical telecom operations, reducing downtime, enhancing data integrity, and meeting the rapidly evolving storage needs of the telecom industry.

Sustainability

Power Loss Protection (PLP) technology & TCG Opal functionality for use in various extreme environments.

Reliability

LDPC ECC algorithms for handling intensive workloads.

Quality

100% chamber tested in-house & major-grade chips deliver trusted quality.

Featured Products

PCIe M.2 2280

MTE712P-I

PCIe M.2 2242

MTE470A-I

SATA III M.2 2242

MTS560T-I

SATA III 2.5"

SSD470P-I

SATA III mSATA

MSA460T-I
